2.      function counter(id, start, end, duration) {
3.          let obj = document.getElementById(id),
4.          current = start,
5.          range = end – start,
6.          increment = end > start ? 1 : –1,
7.          step = Math.abs(Math.floor(duration / range)),
8.          timer = setInterval(() => {
9.          current += increment;
10.          obj.textContent = current;
11.          if (current == end) {
12.              clearInterval(timer);
13.          }
14.          }, step);
15.      }
16.      counter("count1", 0, 400, 20000);
17.      counter("count2", 0, 100, 20000);
18.      counter("count3", 0, 40, 20000);
19.});
```

Output

Here I made a clone of Moodle website. Which also includes the submission of assignment part. I have used HTML, CSS, JavaScript and AngularJS.

Before input :
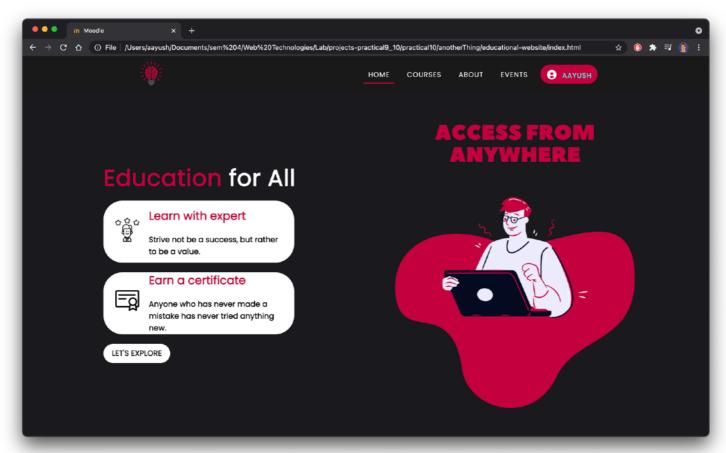

Login form and Registration form :
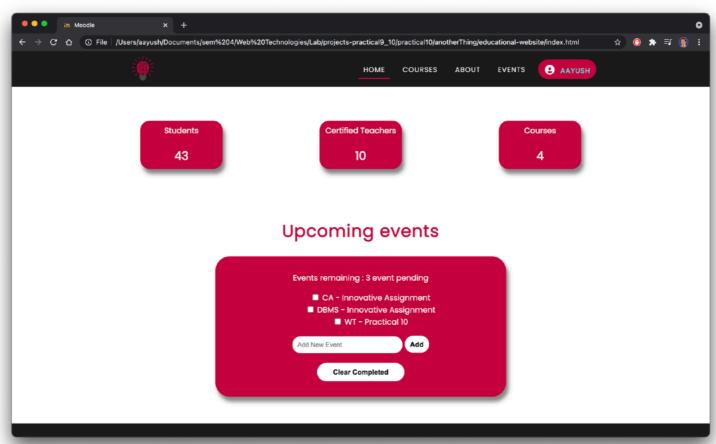

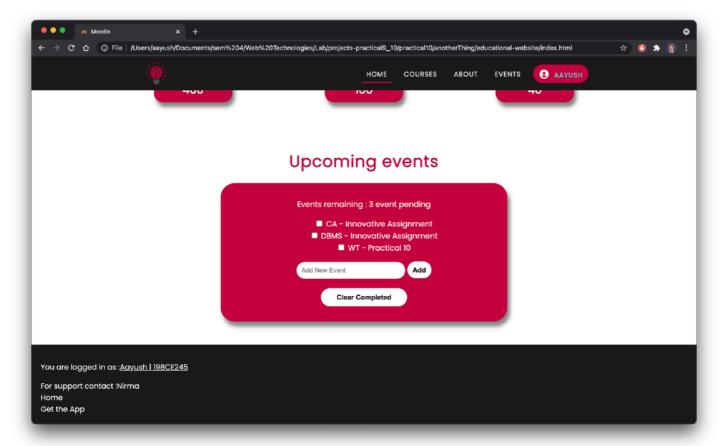

Website after login :

Changing student, teachers and courses counter made with javascript
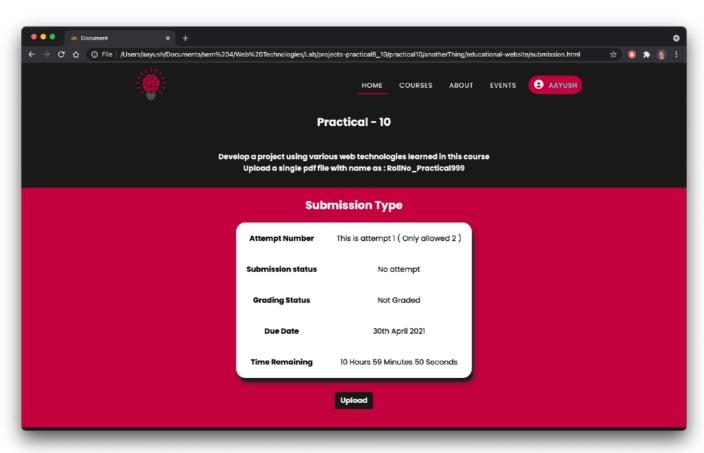

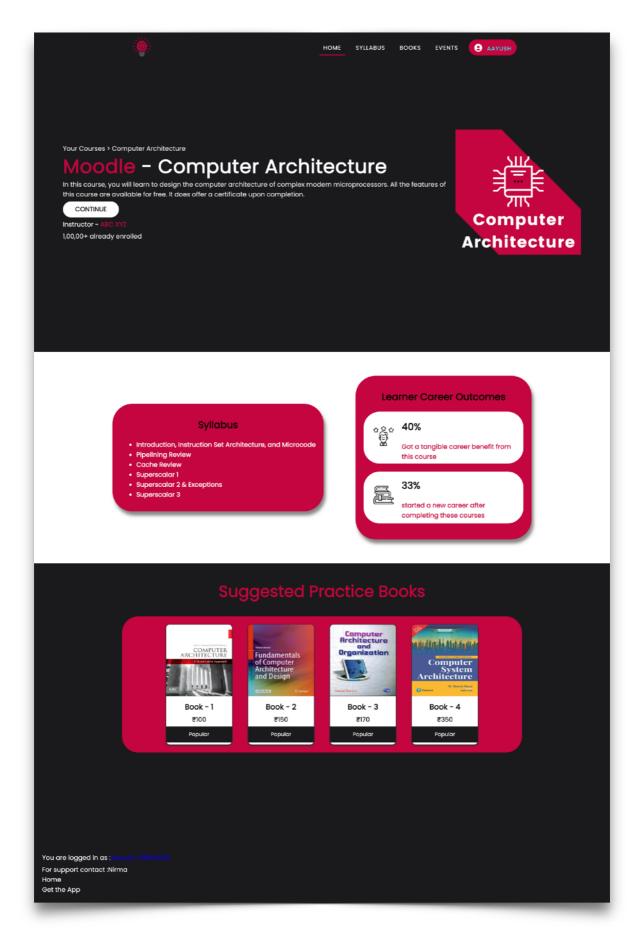

Upcoming event made with AngularJS
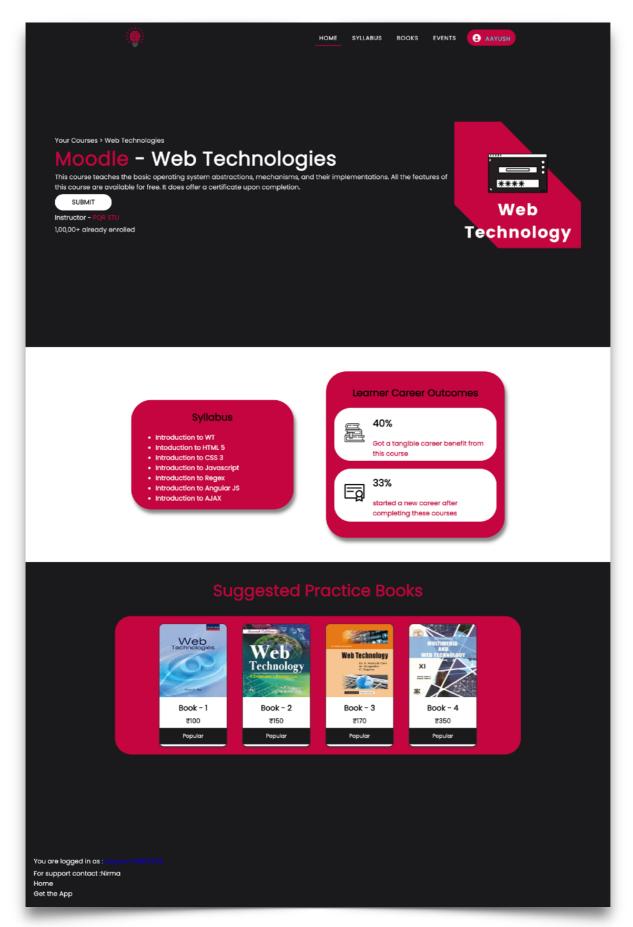

Footer with username and roll number of the logged in student :

Submission page with remaining time counter made with Angularjs :

Computer architecture page :

Wt page :

<u>**Conclusion**</u>

Here we have applied many concepts which learnt in Web Technologies and using all concepts I have created this Moodle website clone.
